

## Application of Validation Principles To The Training Quality System - Part 3: Trainers

**Paul L. Pluta**

By

**Jul 24, 2019 1:33 pm EDT**

When training content is designed and developed, desired trainer skills for successful training delivery are identified. These include personal background and experience; training content technical expertise; and human factors and communication skills appropriate for the intended training. Trainers meeting these requirements are developed and are ultimately qualified for training. Specific individual topics addressed include User Requirements Specifications (URS), Functional Requirements Specifications (FRS) and Technical Requirements Specifications (TRS), trainer recruiting...
