The HVAC Process: Changing the Properties of Air

By **Alexander Delli Paoli, Jr.** Jan 10, 2013 3:44 pm PST

This paper continues a previous discussion describing HVAC systems (1). This and future discussions will provide a working knowledge of the HVAC process. A future paper will address the “dry side” of HVAC, which includes filters, fans, ductwork, controls, and safety components in the system. Download "The HVAC Process: Changing the Properties of Air"
