Views from the event venue.

On 28-30 March, 2017 delegates convened from all corners of the U.S. and Europe in Amsterdam, The Netherlands, for three days of validation mastery. Chairman Paul L. Pluta, Ph.D., Editor-in-Chief of IVT's journals and Associate Professor at University of Illinois at Chicago (UIC) College of Pharmacy, set the stage for both Validation Week and Data Integrity, since they were co-located. Having the two events side-by-side gave attendees access to more sessions, since they were allowed to attend any of the sessions listed for each event.
