6TH ANNUAL

Microbiology WEEK

HANDS-ON TRAINING FOR STERILE AND NON-STERILE
MANUFACTURING CHALLENGES IN THE MICRO LAB

JUNE 12-14, 2018 • PHILADELPHIA, PA

IVT's 6th Annual Microbiology Week is bringing together industry's leading microbiology experts for three days of interactive, customizable and hands-on training sessions on June 12-14, 2018. Addressing the greatest challenges in both sterile and non-sterile manufacturing, this conference provides education on preparing for inspections, industry perspectives on the EU Annex 1 revisions, determining objectionable organisms, implementing CAPAs through root cause analysis, and much more. All new this year — take part in extended 3-hour hands-on workshop to develop a Risk-Based Environmental Monitoring program for your organization.
