

“Purdie Assay” – A New and Novel Assay for Quantification of Total ω -6, Total ω -3, and ω -6/ ω -3 Ratio in Human Serum

May 11, 2013 11:51 am EDT

An assay that is fast, inexpensive, accurate and precise, and addresses the individual quantitative levels of the PUFAs should be of great and immediate importance to researchers in the areas of applied medicine, health management, and other open fields in related applications. This study describes the “Purdie assay,” a new and novel assay developed in the Purdie laboratory that quantifies cholesterol and
