

?Laboratory Studies In Cleaning Validation

Paul L. Pluta

By

May 26, 2013 12:34 pm EDT

Validation practitioners wholeheartedly agreed on the usefulness of cleaning laboratory studies. Cleaning laboratory studies are helpful for understanding and providing a technical rationale for the cleaning process and activities associated with cleaning validation. Depending on the complexity of the large-scale cleaning process, information from laboratory studies may be directly applicable to the large-scale process. Various designs of apparatuses used in laboratory studies and techniques for preparation of dried residue were described. The choice of apparatus design and technique in residue...
