

## Cleaning Validation: Viracept, 2007

By **Michelle C. Killilea** Dec 3, 2012

Nelfinavir mesylate.

API AND DRUG PRODUCT Viracept (nelfinavir mesylate) is an antiretroviral drug (a protease inhibitor) manufactured by Roche in Europe and Pfizer in the US and Canada. This drug is normally used in combination with other medications for the treatment of human immunodeficiency virus (HIV). HIV-1 is the virus that causes acquired immune deficiency syndrome (AIDS) (1). Viracept is approved to treat adults and children older than two years that are infected with HIV, and it is also useful for patients intolerant to zidovudine; pregnant, HIV-infected women; and patients in resource limited settings (1,...
