

Data Culture

By Lynn D. Torbeck Jun 28, 2016 7:00 am EDT

A data culture is characterized by an approach of questions and phrases such as “How many?” “Compared to what?” and “What gets measured gets done” Compliance professionals must develop their own skills and motivation toward a data focus Compliance professionals must work to build a culture of measurement and data, and to integrate that culture into their organizations for the benefit of the company and its patients Management must support the development of a data culture.
