

Drug Preparation and Administration – Using IV Robotics for Insourcing Ready-to-Administer Syringes

Kevin Hansen

By

Oct 28, 2020 1:49 pm EDT

This week on Voices in Validation we welcome Dr. Kevin Hansen to discuss innovations in the Ready-to-Administer drug space, and the way technology is changing the way some hospital systems and their compounding pharmacies source these forms of drugs. In this episode Dr. Hansen will discuss:

- Reduction in adverse events with RTA syringes
- which RTA drugs are most important to operating rooms and ERs
- outsourcing versus insourcing
- challenges in RTA protocols and sterile compounding
- IV Robotics technologies and best implementation practices
- staff and logistical planning for RTA insourcing
