

Excellence and Next Generation Approaches to Quality System Monitoring

Jun 29, 2021 7:00 am EDT

The IVT Network is proud to be your source for industry news, networking and education. In this episode, we will hear an exclusive conversation from the recent CSV Virtual Event, "**Excellence and Next-Generation Approaches to Quality System Monitoring**." This discussion was moderated by Michelle Miller and features Nuala Calnan, Alyce Deegan, and Daniel Caparros.

The discussion will be focused on providing reflections on the current landscape, team challenges in data governance programs and policies, understanding sources of bad data, missing data, data consistency and data integrity, as well as the speed of data delivery and defining metrics, and help in establishing digitally-enabled facilities using real-time analytics for agility in meeting ever-changing markets, and leveraging predictive capabilities to ensure highest levels of quality and control.
