

Patent Potential

May 15, 2013 8:14 am EDT

Pharmaceutical compounds with specific physical properties may be patentable. It is important to show a correlation between the specific physical property and a useful benefit in manufacturing, stability, or some other area. Although polymorphism is a common phenomenon, the existence of stable polymorphs is not obvious. It is important to identify an analytical method in the patent that can be used to demonstrate infringement. Download "Patent Potential"
