

Taking Control of Change, CAPA and COVID - Webinar Replay with Slides

Jun 25, 2020 1:49 pm EDT

In this webinar we covered the need for an uninterrupted supply of life-saving products in pharmaceutical and medical device manufacturing in the face of a pandemic, and company shut-downs.

Bringing consistency to the global supply chain and market for pharmaceuticals and medical devices despite an ever-increasing number of procedures, regulations, guidelines and “expectations” is a challenge - guidelines, both temporary and permanent are discussed.

Managing change as part of the product and process lifecycle, saw dramatic deficiencies (supply chain model) during COVID19. Ideas and strategies for post-pandemic were covered.
