Oct 26, 2021 7:00 am EDT

Implementation of the 2019 final version of USP 800 is not currently being enforced by most states but quite a few pharmacies around the country are either in the planning and budgeting phase or have already moved forward with construction and being compliant with USP 800 standards. In this episode we discuss the impacts regulatory changes may have on the facilities, as well as the necessary planning to consider in building new or renovating existing facilities with our guest Bryan Prince.
