

## Working in Life Sciences: Talent Recruitment, Retention & Engagement - PODCAST

Jul 20, 2021 7:00 am EDT

We have just witnessed the remarkable impacts and successes which can be achieved in life sciences, as industry raced to find a vaccine. Considering breakthrough discoveries and life changing innovations, life science professionals are imperative to the health of our communities, belonging to a sector that's a key economic driver of the global economy. Unfortunately, the ability to hire professionals across multiple functional areas within life sciences has become a competitive imperative. Multiple factors are intensifying the scarcity of talent. In this episode we speak with [Robin Toft](#) about the challenges of attracting and hiring top talent, tactics for building and retaining a workforce, and the technologies that are changing the ways we recruit, hire and train our teams.
